WHERE IS LONYI VILLAGE INNOVATION LEARNING CENTER & WHY IS THIS SIGNIFICANT?

THE PROBLEM | Moyo is a remote location in the West Nile sub-region of Uganda. It is in the northwest corner and shares borders with the Democratic Republic of the Congo and South Sudan. It also hosts more than half of the 1.5 million refugees in the country. The lack of reliable power, water, paved roads, and internet, combined with the highest levels of food insecurity and poverty, creates a difficult environment for improving health outcomes. These conditions are particularly detrimental to maternal and newborn health, impacting both general health and access to essential services. Additionally access to continuing medical education and training is almost nonexistent and the shortage of skilled healthcare workers contributes to the poor healthcare outcomes.

OUR SOLUTION | Pipeline Worldwide is building Lonyi Village, a 3.4 acre humanitarian lodging and training campus in Moyo, Uganda. In addition to lodging and dining, the campus will include an Innovation Learning Center that will include a virtual learning classroom/internet cafe, hands-on learning lab, and a simulation container lab. This center will bring continuing medical education and training to the West Nile sub-region through our collaboration partners resulting in accelerated and increased impact.

Program Focus:

- Maternal and Fetal Health
- Neonatal Health
- Infection Prevention and Control
- Orthopedics
- Emergency Medicine
- Infectious Disease

Pipeline Worldwide is a Phoenix based registered 501(c)3. Donations are tax deductible. Payments can be made online at www.pipelineworldwide.org or mailed to 4815 E. Carefree Highway, Suite 108-270, Cave Creek, AZ 85331

PROGRAM PARTNERS

University of Nebraska Medical Center Global Center for Health Security (GCHC) is an international leader in preparedness and response for high-consequence infectious diseases (HCID), pandemics, and other health emergencies. GCHS comprises state-of-the-art clinical management of HCID through its affiliated Nebraska Biocontainment Unit and National Quarantine Unit, creates and conducts standard-setting education and training for HCID and health emergency consequence management to US government and international partners, and delivers innovative solutions for healthcare systems through discovery and applied research. When disease threatens, GCHS answers.

Infectious Disease Institute at Makerere University, Uganda's mission is to strengthen health systems in Africa, with a strong emphasis on infectious diseases, through research and capacity development. Their core programs include Prevention, Care and Treatment; Research; Health Systems Strengthening; Training; Laboratory Services; and Global Health Security.

Ohana One is a nonprofit organization that provides surgical training in developing countries through smart glass technology.
